

Lore Library Demo Release

Jun 10, 2025

Hello, we are the team bringing you Lore Library, and we are pleased to announce our first public release!

<https://lore-library.vercel.app/>

While not feature complete, the release allows us to showcase our amazing features, and get feedback from users about where we should go from here. We have the following features awaiting feedback from our community:

- Browse other worlds
- Create your world, it's collections and entries
 - Fill content of worlds, collections and entries using various components
- Custom styling for worlds, collections and entries
- User authentication
- Node map of world hierarchy for display and quick navigation

We are still working through the following issues:

- Deleting entire worlds
- Node graph instability on large worlds
- Styling persisting on page change

In the future, you can expect fine grained permissions, new world types, live collaboration, and resource uploads to include in your pages!

Thanks for the support, and we look forward to seeing what you can create with us!
